

Features and Benefits in the AlertCentre® Add-On

The AlertCentre add-on to MKS Toolkit is a complete solution for monitoring, alerting and corrective action automation scheduling. AlertCentre can monitor your mission-critical systems and applications 24 hours a day, seven days a week to provide you with the peace of mind of knowing that your network, applications, and Internet/Intranet-based information systems are running normally.

Feature	Benefit
Automated Monitoring, Alerting and Corrective Actions	<ul style="list-style-type: none">Higher Availability of Business-Critical Systems – allows you to maximize revenue and profit and maintain a solid corporate reputation for reliability and service.Improved Worker Productivity – results when employees can connect without delay to email and other critical services at any hour and from any location.Management -by-Exception – enables systems administrators to focus on their day-to-day duties with the peace-of-mind that AlertCentre will notify them of problems whenever and wherever they are.
Monitoring Solution Wizards	<ul style="list-style-type: none">Automate the discovery of an applications configuration and generation of the detailed monitors necessary to ensure high availability and maximize performance for the application's specific configuration.<ul style="list-style-type: none">Microsoft Exchange ServerMicrosoft Internet Information Server (IIS)Microsoft SQL ServerAPC UPC devicesMicrosoft Windows Servers
Web-Based User-Interface	<ul style="list-style-type: none">Ease of Use – makes it easy to train new system administratorsRemote Administration from any web browser – enables your system administrators to react to problems and fix them promptly from anywhere at work and even from home in the middle of the night.
Agent -less Architecture	<ul style="list-style-type: none">Ease of Deployment – there is no software to install on monitored servers and devices.Less Ongoing Administration –there is less software to keep up-to-date and configure.Lower TCO – fewer people need to manage your systems.
Built -in Redundancy	<ul style="list-style-type: none">Automated Monitoring Fail-Over – with a backup monitoring station set up*, you will be notified of problems even if your power fails during non-office hours.
Built -in Extensibility	<ul style="list-style-type: none">AlertCentre is built on the MKS Toolkit platform that includes hundreds of commands and scripting tools for building custom systems management solutions and filling the holes that limit other monitoring solutions.

* Redundancy feature requires a second license and installation of a valid MKS Toolkit product and the AlertCentre Add-On.
